

Living Healthy with Chronic Pain

Chronic Pain Self-Management Program (CPSMP)

What is *Living Healthy with Chronic Pain*?

Living Healthy with Chronic Pain is a highly participatory workshop that takes place once a week for six weeks. Each 2 ½ hour session is facilitated by 2 trained leaders (many of whom are volunteers living with chronic conditions themselves) who follow a detailed manual, so that each workshop is highly consistent.

Although *Living Healthy with Chronic Pain* does not replace disease-specific education. It is designed to enhance regular treatment options which help participants solve problems they encounter in creating and carrying out their chronic pain self-management program. Physicians and other health professionals both at Stanford and in the community have reviewed all materials in the course. It is the process in which the program is taught that makes it effective. Classes are highly participative, where mutual support and success build the participants' confidence in their ability to manage their health and maintain active and fulfilling lives.

Workshop topics by week

Week 1	Week 2	Week 3	Week 4	Week 5	Week 6
Differences Between Acute and Chronic Pain	Dealing with Difficult Emotions	Making Decisions	Better Breathing	Medication Usage	Working with Your Health Care Professional & the Health Care System
